

Simplified billing for workers' comp providers who treat crime victims

Beginning July 1, health-care providers who treat both injured workers and crime victims can bill both programs using the same number—your workers' compensation provider number.

The new billing is based on simplified provider registration, an improvement designed to reduce providers' administrative costs when doing business with L&I.

New providers after July 1, 2009 will be able to sign up for both programs at the same time using one registration form.

Your provider relationship with L&I determines billing (and possible registration)*
